

Setting Up Application Environment

IBM Cloud CLI

Team ID	PNT2022TMID43850
Project Name	Smart Fashion Recommender Application
Maximum Marks	2 Marks

The screenshot displays the IBM Cloud CLI documentation page. The sidebar on the left contains a 'Get started' section with a link to 'Getting started with the IBM Cloud CLI', and a 'How to' section with links for installing the CLI, installing plugins, extending the CLI, working with multiple accounts, enabling shell autocompletion, and using operation marks. The main content area is titled 'Getting started with the IBM Cloud CLI' and provides an overview of the installation process. It lists several plugins that can be installed manually, including IBM Cloud Functions, Object Storage, Container Registry, and Kubernetes. A tip at the bottom suggests trying out IBM Cloud Shell for a cloud-based shell environment.
